

Is your practice ready for its team | **links** x dental makeover?

BEFORE

AFTER

- Paper chart chaos and clutter
- Slow manual referrals
- Costly inefficiencies
- Waiting to get charts and images from referral sources
- Manual communication process for collaboration
- Wasted time tracking charts
- Accessible only in your office

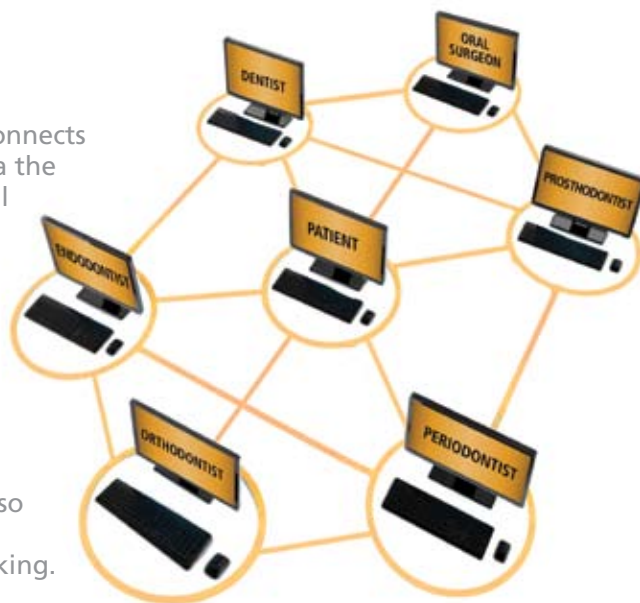

- Virtually paperless charts
- Streamlined referrals
- Financial savings from increased efficiency
- Instant chart access for multiple users and locations
- Detailed collaborative communication built in to network
- More time with patients
- Accessible 24/7 from wherever you are via our HIPAA Compliant, web-based Secured Network

The electronic medical record that allows you to smoothly transition to a “paperless” office

More than just charting - a streamlined communication system

Virtual Collaborative Network

Our web-based platform connects the provider community via the Internet, providing a virtual collaborative network. Referring dentists can access records, track progress and share information on their computers in real time. All of your collaborative communication is done in a secure 100% HIPAA compliant environment. Also facilitates study club administration and CE tracking.

Patient-centered Community Approach

teamlinks-dental gives you one centralized medical record for each patient where the patient is the center of the care. Providers can update the record and communicate it electronically to other referring providers. Each EMR is also an electronic Personal Health Record for your patients through ushealthrecord.com. This creates a unique marketing opportunity for your community.

teamlinks-dental offers MAXIMUM ROI by providing you with the following benefits:

Financial Savings –

- **teamlinks-dental** provides an outstanding collaboration/communication tool with your referring offices, which increases efficiencies and maximizes employees' time, resulting in minimized expenses (can be \$50,000 annually) and increased revenue
- Streamlined referral process saves time and money for you and your referring dental team

Easy transition –

- Was visually designed to simulate a patient's chart, making the transition from a paper chart to an EMR easy-to-understand, logical and easy to implement
- Created user-friendly with easy drop down menus that allow you to capture and select entries to eliminate “interpretations”
- Provides increased workflow efficiency with flexibility to work with your current workflow
- Readily accepts input from the doctor and other caregivers
- Offers options for each doctor to dictate and insert transcribed documents or use the available templates
- Works alongside your current practice management software

Why stay in the paper past?

Get **teamlinked** to your paperless future today!
